Professional Summary

Detail-oriented analytics and audit professional with hands-on experience in journal entry testing, audit sampling, and process automation. Proficient in Power BI, Excel VBA, and data analytics platforms (Teammate Analytics, DataSnipper) to identify anomalies, streamline workflows, and improve reporting accuracy. CISSP-certified with a strong foundation in data-driven decision-making and workflow optimization.

Certifications: CISSP (Certified Information Systems Security Professional), Data Analyst

Skills: Audit Sampling, MUS, Random, Stratified, Process Automation, Prompt Engineering, Context Engineering

Languages: Python, SQL, R Programming, Advanced Excel & Macros (VBA), Google Apps Script

Technologies & Tools: Excel, Power BI, Tableau, Teammate Analytics, DataSnipper, Foxit, Google Workspace, Google AppScript, Shopify

Work Experience

Data Analyst Intern — Trepechy Jewellers (On-site)

April 2025 – June 2025

- Collaborated with cross-functional teams to optimize e-commerce operations, supporting continuous process improvement initiatives across product listing and inventory workflows.
- Built process automation solutions using Google Apps Script, reducing manual processing time on recurring product-data tasks by approximately 20–30%.
- Contributed to a centralized Product Process Automation System (multi-tab Streamlit application) that improved workflow visibility across product listing, inventory, and order-tracking stages of jewellery production tracking.

Digital Transformation Intern — KNAV (On-site)

June 2025 – Jan 2026

- Performed journal entry testing on client datasets using analytics tools to identify anomalies and support audit procedures, reviewing 1,000+ transactions per engagement.
- Applied audit sampling techniques — including Monetary Unit Sampling (MUS), random, and stratified sampling — to design statistically defensible, data-driven test plans.
- Extracted, cleaned, and analyzed large client datasets using Teammate Analytics, Excel, and DataSnipper, improving testing turnaround time by approximately 20–30%.
- Developed automation macros for email communication, report generation, and data summarization, cutting manual reporting effort by approximately 3–5 hours per week.

Power BI Intern — Forage (Virtual Internship)

Nov 2023 – Dec 2023

- Used Excel, Tableau, and Power BI to track and analyze category-performance KPIs as part of a simulated retail analytics engagement.
- Performed data analysis using Excel, Access, Tableau, and Power BI to derive actionable business insights from sample retail datasets.
- Designed and built interactive Power BI dashboards to visualize trends and support data-driven decision-making.

Project Work

Survey Report Automation Dashboard (2026): Built an Excel VBA-based automation solution to streamline quarterly survey reporting — processing raw data, classifying responses by quarter, and calculating category-wise metrics automatically. Designed automated charts and dashboard visualizations to surface survey trends, reducing manual reporting effort by approximately 20–30% while improving accuracy and consistency.

Automation Macro for Quarterly Reports (2026): Developed automation macros to generate graphs and summary reports from quarterly performance data, cutting manual reporting time by approximately 3–5 hours per cycle through automated data processing and visualization.

Education

SIES College of Commerce & Economics

BSc in Information Technology

Apr 2022 – Jun 2025

CGPA: 8.25/10

SIES College of Commerce & Economics

Higher Secondary Certificate (HSC)

Apr 2021 – Feb 2022

Scored: 74.50%
